A Slight oil leak,  
actually, all of it!

Well Oiled!

All hands to the pumps!

Cleaning up the oil leak caused by a split oil feed hose

You don't want to know how the hose split, that is confidential anyway.

Let's just say that the correct race preparation was not conducted in the usual thorough manner!

I'd just like to say thanks to everyone who helped out that day. It's nice to know you have friends you can rely on when it hits the fan!

A few of the other competitors at speed

You get a good view of the paddock entrance when you are in the A1 Class
